SUMMARY

Experienced Full-Stack Developer with over 4 years of expertise in building responsive web and mobile applications using JavaScript, React and Node.js. Proven ability to lead projects from concept to deployment, optimize performance and collaborate with cross-functional teams to deliver scalable, high-quality products. Adept at tackling complex technical challenges and consistently delivering results in fast-paced environments.

EXPERIENCE

Full Stack Developer

Dojah (dojah.io)

February 2021 – Present

- Developed a high-traffic web widget, managing over 2,000 concurrent users with minimal downtime, ensuring a seamless user experience using Next.js.
- Optimized complex database queries with Mongoose and refactored backend logic in Node.js, reducing response times by up to 85%, enhancing scalability and improving application performance.
- Extended and maintained a RESTful API using Express.js and NestJS, processing over 100,000 requests daily with an average response time of 193ms, supporting key business operations.
- Played a key role as an early-stage employee, contributing to product direction and company culture by participating in product requirement meetings and decision-making processes.

Front End Developer

Jasere (jaseregames.com)

May 2024 – September 2024

- Implemented real-time multiplayer gameplay using React and WebSockets, enhancing the interactive experience and increasing user engagement during game sessions.
- Collaborated with the product team to transform user feedback into actionable UI/UX improvements, iterating on the interface to boost usability and satisfaction.
- Optimized front-end performance by refactoring code and improving asset management, reducing load times by 30% and ensuring smooth performance on low-end devices.

Front End Developer

24Seven (app.24seventech.co)

October 2022 – December 2023

- Developed a high-performance single-page application using React and Redux Toolkit, significantly improving responsiveness and reducing load times.
- Translated Figma designs into pixel-perfect, responsive web pages, ensuring seamless user experience across both desktop and mobile devices.
- Integrated RESTful APIs to provide dynamic content, elevating user engagement through interactive features and enhancing overall functionality.

Back End Developer

Muzu (muzu.co)

April 2021 – December 2023

- Solely developed a scalable RESTful API with Node.js and Express.js, enabling smooth integration with backend services and enhancing the platform's overall performance.
- Designed and implemented a subscription system for over 500 users, handling user registration, payment processing, and account management using MongoDB, Paystack API and PayPal API.
- Collaborated closely with product owners in meetings and through continuous feedback loops, ensuring that the project met business goals and user needs, leading to a successful product launch.

EDUCATION

Master of Science in Process Engineering

Cranfield University • 2019

SKILLS

Technical Skills: JavaScript, TypeScript, HTML, CSS, Node.js, Express.js, MongoDB, Git, React, React Native, NestJS, Next.js, MySQL, PostgreSQL.

Industry Knowledge: Web Development, API Design, API Integration, Agile Methodologies, UI/UX Design, Version Control, Database Management, Performance Optimization, Cross-Platform Mobile Development, Security Practices, DevOps, CI/CD.
