SUMMARY

Results-driven Full-Stack Developer with 5+ years of hands-on experience building scalable, responsive web and mobile applications using JavaScript, React, Node.js, and modern frameworks. Proven track record leading projects from ideation to deployment, optimizing performance, and collaborating with cross-functional teams to deliver high-impact solutions. Skilled in solving complex technical challenges in fast-paced environments, with a focus on enhancing user experience and driving business growth.

EXPERIENCE

Front End Developer

24Seven (app.24seventech.co, erp.24seventech.co)   **October 2022 - Present**

• Built a high-performance single-page application with React and Redux Toolkit, enhancing responsiveness and cutting load times significantly.
• Converted Figma designs into pixel-perfect, responsive web interfaces, delivering consistent experiences on desktop and mobile platforms.
• Integrated RESTful APIs to enable dynamic content and interactive features, increasing user engagement and application functionality.

Full Stack Developer

Dojah (dojah.io)   **February 2021 - Present**

• Developed a high-traffic web widget handling over 2,000 concurrent users with near-zero downtime, leveraging Next.js to ensure seamless performance and scalability.
• Optimized database queries using Mongoose and refactored Node.js backend logic, slashing response times by up to 85% and boosting overall application efficiency.
• Maintained and expanded a robust RESTful API with Express.js and NestJS, processing 100,000+ daily requests at an average of 193ms, supporting critical business operations.
• Contributed as an early-stage team member to product strategy and company culture through active participation in requirements meetings and decision-making.

Front End Developer

Jasere (jasere.netlify.app)   **May 2024 - September 2024**

• Implemented real-time multiplayer features using React and WebSockets, elevating user engagement and interactivity in gaming sessions.
• Partnered with product teams to incorporate user feedback into UI/UX enhancements, resulting in improved usability and higher satisfaction ratings.
• Refactored front-end code and optimized asset loading, reducing page load times by 30% for smoother performance across devices, including low-end hardware.

Back End Developer

Muzu (muzu.co)   **April 2021 - December 2023**

• Single-handedly architected a scalable RESTful API using Node.js and Express.js, facilitating seamless backend integrations and platform-wide performance improvements.
• Designed and deployed a subscription management system for 500+ users, integrating MongoDB, Paystack, and PayPal APIs for secure registration, payments, and account handling.
• Collaborated with product owners via iterative feedback loops to align development with business objectives, culminating in a successful product launch.

EDUCATION

Master of Science in Process Engineering

Cranfield University • 2019

SKILLS

Technical Skills: JavaScript, TypeScript, HTML, CSS, Node.js, Express.js, MongoDB, Git, React, React Native, NestJS, Next.js, MySQL, PostgreSQL.

Industry Knowledge: Web Development, API Design, API Integration, Agile Methodologies, UI/UX Design, Version Control, Database Management, Performance Optimization, Cross-Platform Mobile Development, Security Practices, DevOps, CI/CD.
